

## Hidden

Initial setup was hidden to avoid displaying the API key. It was setup as follows:

```
from exa_py import Exa
exa = Exa('My-API-Key')
```

## Query Search

I went ahead and searched, “Best restaurants in Madison, Wisconsin” and got the following results:

```
query = input("Enter your search query: ")
response = exa.search(
    query,
    num_results=10
)

print(response)
```

```
